Notice of Allowability	Application No.	Applicant(s)		
	10/724,300	HAAS ET AL.		
	Examiner	Art Unit		
	Amelia A. Owens	1625		
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.				
1. This communication is responsive to <u>IDS filed 11-26-2003</u> .				
2. The allowed claim(s) is/are <u>1-52</u> .				
3. The drawings filed on are accepted by the Examiner.				
4.				
Attachment(s) 1. Notice of References Cited (PTO-892) 2. Notice of Draftperson's Patent Drawing Review (PTO-948) 3. Information Disclosure Statements (PTO-1449 or PTO/SB/08), Paper No./Mail Date Paper No./Mail Date Statement Regarding Requirement for Deposit Of Biological Material 5. Notice of Informal Patent Application (PTO-152) 6. Interview Summary (PTO-413), Paper No./Mail Date Statement Paper No./Mail Date Statement Paper No./Mail Date Of Biological Material 5. Notice of Informal Patent Application (PTO-152) 6. Interview Summary (PTO-413), Paper No./Mail Date Statement Paper No./Mail Date Of Examiner's Amendment/Comment Statement of Reasons for Allowance Of Biological Material				

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art neither teaches nor suggests the process as presently recited in the claims. The prior art discloses that is well known to recycle solvents in epoxidation processes. However, the recycled solvent adds impurities to the process. See for example USP 5,599,955 that makes no mention of the amount of nitrogen in the process. The novelty resides in limiting the amount of nitrogen in the process upon recycling of the solvent. Applicants are limiting the amount of nitrogen in the process to less than 50 wppm (weight parts per million = mg/kg). Faraj (USP 6,042,807) teach the particular zeolite catalyst used in applicants epoxidation process. See abstract, column 1 lines 41-65. However, the Faraj process makes no mention of the amount of nitrogen in the process. See column 5 line 30 thru column 7 line 30.

The data on page 20 of the specification is noted. Limiting the amount of nitrogen present in the process results in increased catalyst activity demonstrated by the increased propylene oxide yield.

In view of the art as a whole, the claimed subject matter of limiting the amount of nitrogen in the epoxidation process is neither taught nor suggested. Accordingly the claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amelia A. Owens whose telephone number is 571-272-0690. The examiner can normally be reached on Monday - Friday from 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cecilia Tsang can be reached on 571-272-0562. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
